

Lucas Ochoa, Gautam Bose, and Marisa Lu

for Emoto v2, the open source hardware foundation
that PointoBot is built upon.

Violet Han, HCII, ISL

for the first articulation of what this thesis was trying
to say.

Paul Pangaro

for conversations that helped focus and sharpen
the direction of this inquiry.

Daniel Rosenberg Muñoz

for helping scale this work to room scale interaction and for the
Spatial Experience Lab as a deployment context.

Jeremy Ficca

for being open and supportive throughout this process.

And my partner & friends!

Thankyou!
